

Mobrey

The Mobrey MSM pipe mount kit

Description

The MSM448 kit is designed for use in slurry monitoring applications where the use of Mobrey pipe section sensors is not possible.

The kit of parts is supplied for the user to weld on to an existing pipe section.

It is intended that the kit is used with an MSM400 control unit. For further details contact sales office and ask for leaflet IP257.

Application

Ideal for monitoring a wide range of slurries including :

- Primary & secondary sewage sludge
- Nuclear waste
- China clay
- Mineral oils

The MSM kit comprises :
