C	0733	Update the address and remove the statement that will be added on the board		KM	RH	29/05/2025

## POLICY

- Delta Mobrey Ltd is committed in all aspects of their design and manufacture, to the prevention of harm to people, the incursion of accidents, and damage to the environment.
- In accordance with IEC 61508:2010 and as manufacturer and supplier of process control instrumentation, Delta Mobrey understands zero risk is impossible to achieve. Therefore, care must be continually taken to ensure the highest quality of manufacturing is achieved on a daily basis.
- The process control instrumentation designed and manufactured by Delta Mobrey includes, but is not limited to pressure, temperature, flow switches, transmitters, and level instruments. Products supplied for use in safety-related systems will be assessed for functional safety throughout the design and manufacturing process.
- Delta Mobrey will continue to systematically manage its operating activities through ongoing quality procedures to continuously reduce risk to life.
- Delta Mobrey will formally identify, assess, and mitigate functional safety hazards and risks, appropriate to the nature and scale of Delta Mobrey's scope of supply.
- Delta Mobrey will ensure that both its management and staff take responsibility to address any potential safety hazards when they are identified and reported.
- Delta Mobrey will ensure all management and staff are provided with information and instructions on Delta Mobreys Functional Safety Policy and quality procedures and that all interested parties have access to these procedures.
- Delta Mobrey will comply with all relevant functional safety standards and safety requirements to which the organisation subscribes and ensure that all management and staff are provided with information, instruction and training to be able to comply with those requirements.
- This policy and strategy for achieving functional safety must be communicated within the organisation from top to bottom to ensure a culture of safe working.
- For more information on functional safety visit:
